

BACKGROUND & EXPERIENCES

[GAD PERIOD]

Mustafa Kemal KAYIŞ
architect & real estate developer

MUSTAFA KEMAL KAYIŞ

CONTACT

Address:

Huzur District, Cumhuriyet Street
No:49/46 Sariyer
İstanbul

Phone:

+90 543 799 96 33

Email:

mustafakemalkayis@hotmail.com
[linkedin.com/in/mustafakemalkayis/](https://www.linkedin.com/in/mustafakemalkayis/)

ADDITIONAL SKILLS

Abilities:

Architectural Design,
Design Management,
Business Development,
Real Estate Development,
Presentation,
Finance
BIM,
Visual Programming,
Machine Learning,
Deep Learning

Design Softwares:

Autodesk Revit, Autocad, 3dsmax,
Photoshop, Lumion, Unreal

Microsoft Office package:

Microsoft Word, Excel, Access

Programming:

Python,
Dynamo

Statistical operation:

SPSS

PROFESSIONAL SUMMARY

Provide different services and roles in many fields of Architecture Industry in 15 years, at the beginning as a design and manufacturing manager in a PPVC company, than as a freelancer and company owner and after that for a long time as a managing partner in a leading company, including master plan design, building design, construction site supervision, business development, real estate development, architectural software development etc.

I spent almost my last 2 years by working on programming, artificial intelligence, machine learning, deep learning and data science for my master studies. I have prepared my Master Thesis about Artificial Intelligence in Architecture, and it was about Using Convolutional Neural Networks in Site Plan Design.

I want to democratize good environment design access for anyone in the world.

PROFILE

- To produce permanent and contemporary solutions to current problems.
- Optimal use of resources and teams with result-focused work
- Create an innovative business administration by creating a stable structure that learns fast and continuously
- Maximize the involvement of all project stakeholders in the project by keeping the work efficient
- To follow and use new trends, technologies, software, communication and presentation methods in order to reach the specified goals
- Developing Data Strategies to create applications using machine learning in architectural practice.

EXECUTIVE LEVEL ABILITIES

- Creativity and Innovativity
- Leadership
- Project management
- Self Motivation
- Team membership
- Fast Learning

EDUCATION

	2016 - 2019
Master of Science Degree of Real Estate Development, Istanbul Technical University	
	2000 - 2004
Bachelor Degree of Architect, Yıldız Technical University	
	2012 - 2013
Russian Course, Beginner, Dilmer, Istanbul	

LANGUAGES

Turkish – Native speaker
English – Professional
Russian – Beginner

I believe in art & science.

The most magnificent abilities that humankind can achieve.

I studied architecture and real estate development. It is a kind of art & science mix for me.

Nowadays, I am working on developing algorithms and data science.

I have such a passion to combine my skills and experiences with the artificial intelligence, to democratize the accessibility to good design, sustainable environment and better building solutions for most of people.

To achieve this level of vision I focused my studies about "AI in Architecture" in my Master Thesis (Title: Using Convolutional Neural Networks and BIM for Site Plan Design).

For me, architecture is not only designing buildings. It is also building relations. It is a way of communication. Different phrases of culture.

Architecture disciplines design thinking. Without architecture feelings, real estate development or investments would be just stones, marbles, steels, square meters; I mean only physical elements.

As an architect and real estate developer I always try to create solutions covering quality, sustainability, functionality, economy and esthetic

WORK EXPERIENCE

09/2010 – 08/2019

Managing Partner, GAD Architecture Company, Istanbul / Turkey Responsibilities:

- Leading the projects and business development activities that I have conducted as a company managing partner. MIPIM 2017, MIPIM 2018, ARCHMOSCOW 2017, ARCHMOSCOW 2018 activities.
- Take position and responsibility for team work and leadership in the process of preparing proposal, contract, concept design, preliminary project, permit and construction drawing and technical documentation in different projects.
- Supporting the related processes by creating and developing new departments and teams (new studios, site teams, model departments, real estate development departments, construction departments etc.) established within the company.
- To play an active role in the design works prepared in various competitions and proposals and to have a role in getting new jobs so as to create new business and income sources.
- To make selection, negotiation and correspondence regarding personnel, software, hardware, tools and equipment to be taken into the company, to supervise the implementation of procurement procedures.
- Supporting the finance department by following the customer payment process in the completed project processes and following public supports in architecture industry.
- To play a constructive role in solving internal crises and creating a continuously improving structure and ensuring that they meet in common values and interests.
- Establishing new business connections, conducting business development activities, fulfilling corporate representation duties. Key role in the process of developing Big Data and Machine Learning based web application for the industry.
- Organizing at fairs, conferences and events, taking part in media relations
- Executing in-house BIM management and giving Revit training.
- Within the scope of real estate development activities; starting from the availability of suitable land following works were done, to carry out best & highest, feasibility, cash flow, market research studies etc.
- To carry out the activities necessary for the opening of the representative office in Moscow.

Achievements:

- MANAGING PARTNER, BUSINESS DEVELOPMENT (01/2017 – Present)
Increased business development activities and signed contracts %200 within a year after I started to work as the manager of business development department.
- MANGAGING PARTNER, SENIOR DESIGN MANAGER (01/2012 – 01/2017)
Completed more than 40 international projects with different goals and difficulties with my team of 6 architects in 6 years successfully.
- DESIGN ARCHITECT (10/2010 – 01/2012)
Completed many architectural designs in different countries and cities including Istanbul, Antalya, Ankara, Moscow, Kazan, Tashkent, Kyiv, Skopje, Nairobi, Kigali. Most of our designs were awarded by international organisations.
- PUBLISH, INTERVIEW AND CONFERENCES (10/2010 – Present)
2015 Green architecture Conference (Istanbul, Speaker), 2017 EMITT (Istanbul, interview), 2017 ITU BIM & sustainability Lecture (Istanbul,

Speaker), 2018 Dunya Newspaper (Interview), 2018 Archmoscow Conference (Moscow, Speaker)

Awards:

- AHK KUNDU Villas
Home Overseas Russian Awards (2018)
Sign of The City Awards (2017)
The Greenest Building Under Construction (2015)
European Property Awards (2015)
- THE ISTANBUL OFFICES MERTER
Green Good Design (2015)
- MEDIA CITY PROJECT
WAFX Smart City Prize (2017)
AR Future Projects Awards (2017)
- RELUX SUIT OFFICE TPST
International Property Awards (2013)
- NLF RESIDENCES (2011)
International Property Awards
- NEWADA RESIDENCES (2011)
Sign of The City Awards

05/2006 - 09/2010

Freelance Architect, Own Company, Istanbul / Turkey

Responsibilities:

- I managed my own freelance works for almost 4 years. I designed more than 100 multi family residences and houses in this period.
- I managed all works including lead generation, proposal and contract documentation, negotiation, building design, concept design, detail development, building permit documentation, site supervision etc.

06/2004 - 05/2006

Design and Production Manager, Ozturk Prefabricated Company, Istanbul / Turkey

Responsibilities:

- I designed new products as prefabricated homes and steel structure buildings.
- I managed 30 skilled workers in a 5000 m² factory.
- I developed new control documentation policy for design and production process.

GAYRİMENKULDE TRENDLERİ ARTIK

Y KUŞAĞI

BELİRİYOR!

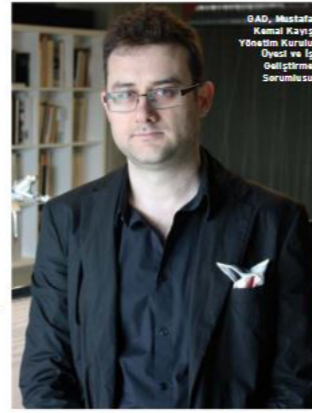

GELİŞTİRDİKLERİ PROJELERİ, KALICI TASARIM YAKLAŞIMLARI İLE FARKLIlaştırarak MARKALAŞTIRAN GAD'İN GENÇ ORTAKLARINDAN, İŞ GELİŞTİRME SORUMLUSU MUSTAFA KEMAL KAYIŞ İLE, ÖZGÜRLÜKÇÜ, TEKNOLOJİYİ KULLANAN, GİRİŞİMCİ, SOSYAL ETKİ ALANLARI GENİŞ OLAN Y KUŞAĞININ GAYRİMENKUL TERCİHLERİ ÜZERİNE YAPTIĞI ARAŞTIRMALARI VE FİKİRLERİ ÜZERİNE KEVİFLİ BİR SÖYLEŞİ GERÇEKLEŞTİRDİK.

Gündemimiz gençler ve biz de bu konuyu sizin gibi sektörde genç sayılabilecek bir profesyondardan dinleyelim istiyoruz.

Sektörümüzde gençlerin etkisinin her geçen gün arttığını ve bunun için o kadar da fazla çalıştığımızı belirttik. Özellikle de sosyal medya ve teknoloji sayesinde bu alandaki hareketliliğin hızla arttığını söyleyebiliriz. Özellikle de sosyal medya ve teknoloji sayesinde bu alandaki hareketliliğin hızla arttığını söyleyebiliriz.

Bu Y Kuşağına biraz dikkatli miyiz? Kimlerdir bunlar, ne yer ne işler, ne kadar sever ne kadar hoşlanmazlar sizce?

Y Kuşağı'nın 1980 ile 2000 arasında doğmuş ve yetişen bir nesil olduğunu düşünürüz. Yani en son doğan kuşaktır. Bu kuşağın en önemli özelliği teknolojiyle çok yakın ilişkisi ve teknolojiyi kullanmasıdır. Bu kuşağın en önemli özelliği teknolojiyle çok yakın ilişkisi ve teknolojiyi kullanmasıdır.

GAD, Mustafa Kemal Kayış
Yönetim Kurulu Üyesi ve İş Geliştirme Sorumlusu

Bu kuşaklarımızın öncelikli ihtiyaçları ne? Beklentileri de gerçeğe dönüştürüyor muyuz? Babalarımız, annelerimiz ya da onların baba ve anneleri de geçmişten devraldıkları değerler miydi ya da öğrendiklerine değin değiller miydi?

Bu kuşaklarımızın öncelikli ihtiyaçları teknoloji, sosyal medya ve teknolojiyi kullanmasıdır. Beklentileri de gerçeğe dönüştürüyor muyuz? Babalarımız, annelerimiz ya da onların baba ve anneleri de geçmişten devraldıkları değerler miydi ya da öğrendiklerine değin değiller miydi?

Kompakt çözümler gibi. Bu temel özelliklere sahip olarak, her geçen gün daha fazla sosyal medyaya ve teknolojiye maruz kalıyorlar. Bu durumun sosyal medya ve teknolojiye maruz kalıyorlar. Bu durumun sosyal medya ve teknolojiye maruz kalıyorlar.

Belirttiğiniz kavramlar gayrimenkul sektöründe çok da derinleşmiş konular, bunu nasıl daha çok ifade edebilirsiniz?

Bu kavramların derinleşmesi için sosyal medya ve teknolojiyi kullanmaları gerekir. Bunu nasıl daha çok ifade edebilirsiniz?

MİMARLIK VE İNŞAAT DÜNYASI / GAD GRUBU

"Yurt dışı projelerimizde Türk malzemeleri kullanmaya önem veriyoruz"

Ünlü mimar Gökhan Avcıoğlu'nun kurduğu GAD Grubu, yaptığı projelerle ve aldığı ödüllerle adından söz ettiriyor. GAD'ın profesyonel ekibi yenilikçi ve fark yaratan tasarımlar geliştirirken, GAD İş Geliştirme Direktörü Mustafa Kemal Kayış "Özellikle yurt dışı projelerde Türk malzemeleri kullanmaya büyük önem veriyoruz" diyor.

MİMARLIK VE İNŞAAT DÜNYASI / GAD GRUBU

Bu sayımızda "Mimarlık ve İnşaat Dünyası" bölümünde, Türkiye'nin önde gelen mimarlarından Gökhan Avcıoğlu'nun kurduğu GAD Grubu'nu ağırladık. GAD Architecture, GAD LABS, GAD Interior grubun öne çıkan markaları. GAD İş Geliştirme Direktörü Mustafa Kemal Kayış (MKK), GAD Proje Müdürü Semih Acar (SA), Nezirin Çelik (NC), Çiğdem Çankır (CC) ve GAD Vakfı Yönetim Kurulu Üyesi Cemal Çağdaş Erel (ÇCE) ile grup çatısı altında çalışmalarını nasıl yürüttüklerini, ürün ve proje geliştirmenin ne kadar önemli olduğunu, yurt dışındaki projelerin neye bağlı olduklarını ve merak ettiğimiz diğer konuları konuştuk.

"TASARLADIĞIMIZ TÜM PROJELER DEĞER GÖRÜYOR"
GAD Architecture ses getiren ve ödüllü alan projelere inza attı. Öne çıkan projelerimizden Medya Kent Projesiyle, "MİPIM AR Future Project Award 2017"de Firi Özel Ödülü aldınız. Gökhan Avcıoğlu ve GAD için "ödüle avcı" tanımını doğru olur herhalde...
MKK: Avcıoğlu'nun, mimarlık ve yerleşme kültürünün en doğru ve çapa aygıtı şeklinde uygulamak ve bu kültürün doğru devam ettirilmesi sağlanarak olarak özdeşleştiririz. Gökhan

[d1]greenhouse:

The southern facade of each housing unit is a greenhouse, for users to enjoy environment. The space is differentiated from main mass for activities such as breakfast, tea or social gathering or it is even suitable as a garden to grow plants.

[d3]wooden cladding:

East and west facades of building are glazed. North and south facade are protected with wooden cladding. This element acts as a 2nd facade and shell for the design, It protects the structure and helps to articulate the exterior form of the building.

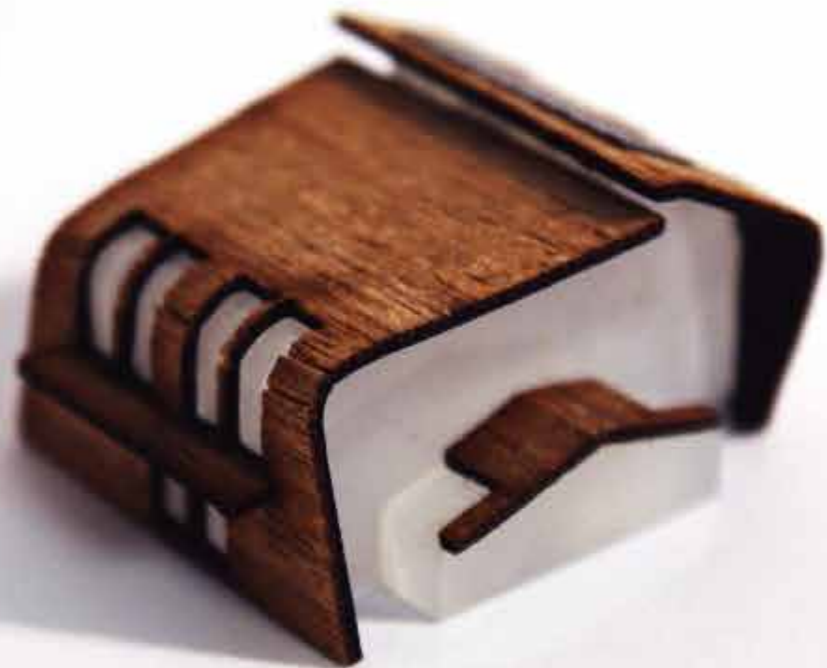

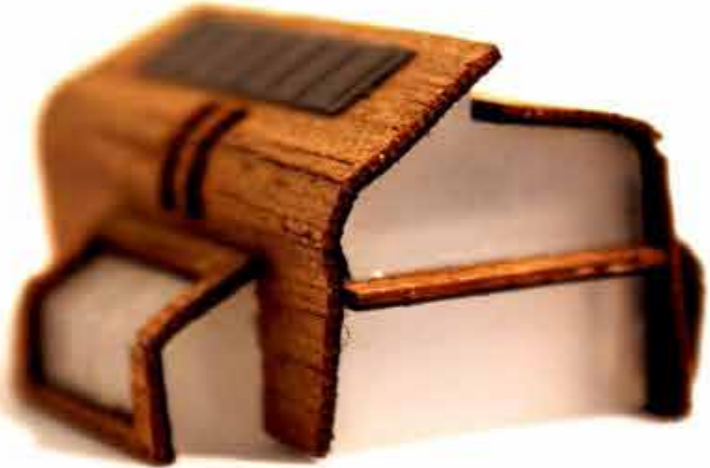

[d2]photovoltaic panels:

The roof of southern facade contains photovoltaic panels; usage for producing renewable energy. The buildings energy requirements will be provided by photovoltaic panels due to the orientation of housing units specific to the sun path of Antalya.

[d4]clerestory window:

Wind analysis helps us to improve natural ventilation for each housing unit. Every unit is ventilated by a main clerestory window. The climate inside the building is controlled with natural sustainable design principles.

5- the Istanbul Merter Office - Istanbul

5- the Istanbul Merter Office - Istanbul

1- building aligned to the site borders

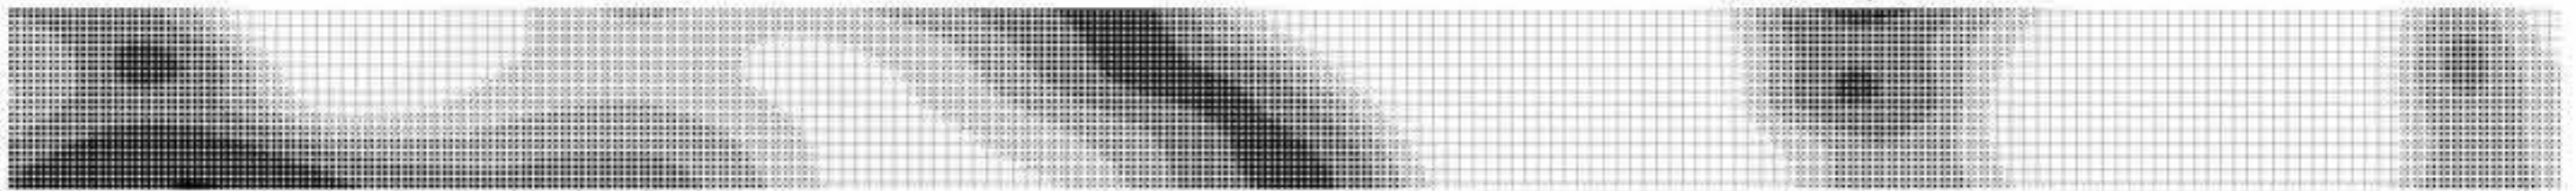

2- courtyards existing on elevated garden are strongly connected to the entry

3- an elevated garden is accesible for users

4- maximum daylight useage and capturing due to the floorplan shape

5- external facade protect from the high noise and wind of the site, and are also naturally ventilated spaces

6- sunlight collection and control as a renewable energy source

YEDİTEPE MERTER project is located in Merter, one of the busiest districts in Istanbul . It is nested next to the highway as a mid-rise building on an approximately 6000sqm site. The building is aligned to the site borders, cultivating the area as a single block, consisting of 7 mini blocks and 4 inner courtyards. Courtyards are insulated from the highway with a translucent façade.

The sustainable design strategy consists of the following: natural ventilation via strategic openings, maximum daylight useage and capturing due to the floorplan shape, sunlight collection and control as a renewable energy source, plus a green and public space for social sustainability use.

The façade design is based on the environmental uses for the building. For entry levels it is shaped by the courtyard boundaries to allow more daylight to penetrate inside the floor plan; for upper levels photo-voltaic panels are cladded to capture it as a sustainable resource for energy.

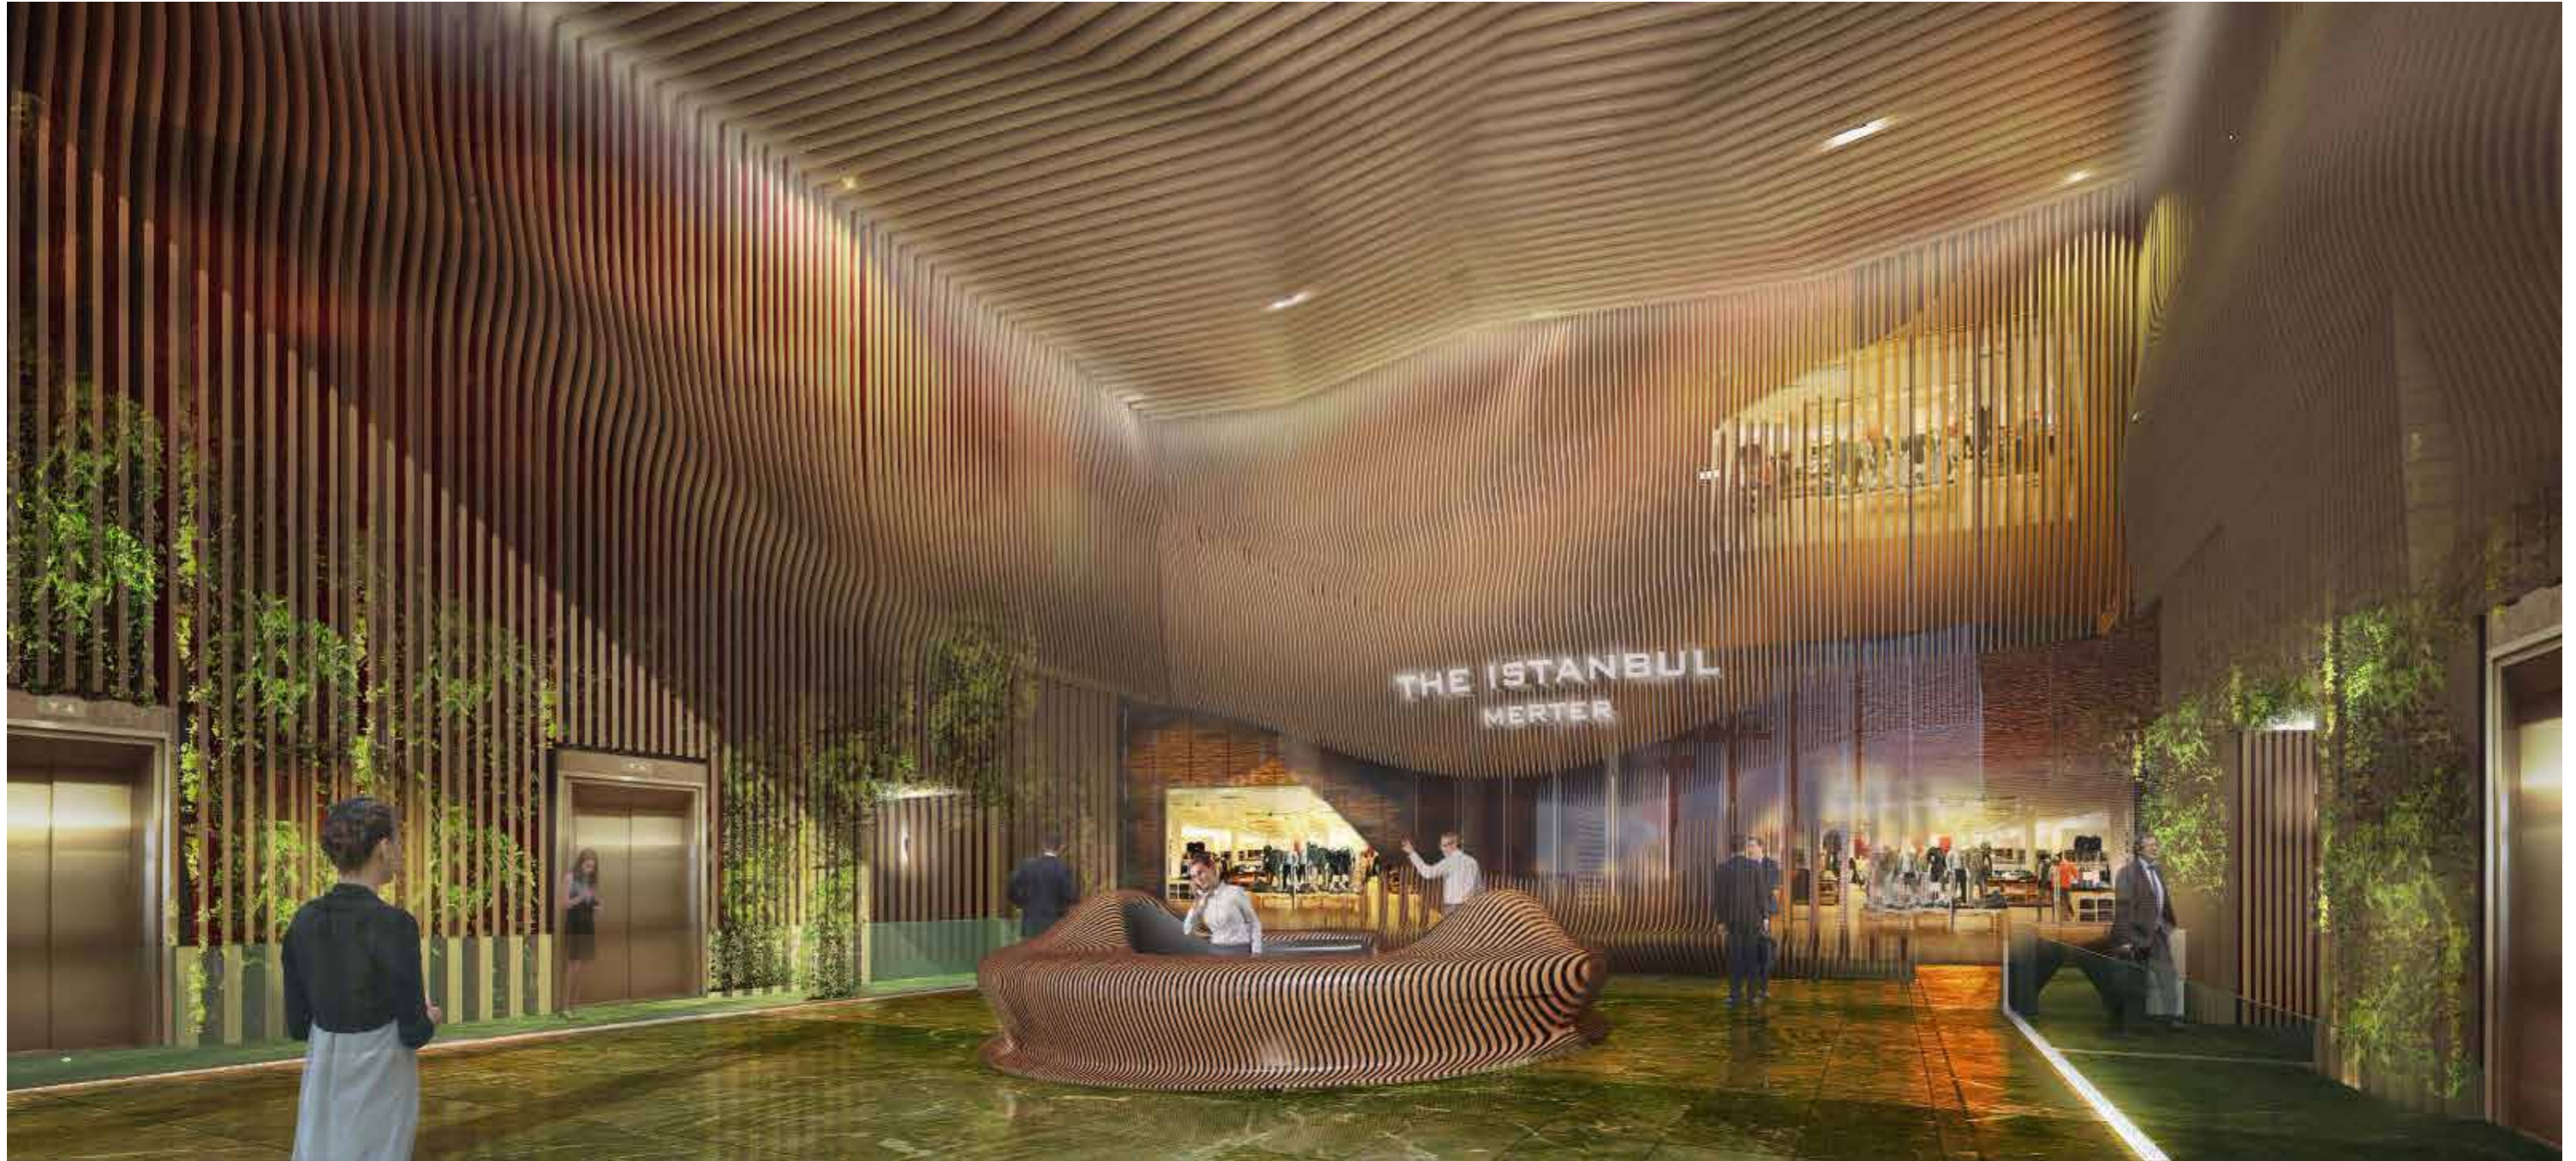

Courtyards with external facade protect from the high noise and wind of the site, and are also naturally ventilated spaces.

As for additional social land use, an elevated garden is accesible for users, creating valuable public space, which is exteremly difficult to find in the neighbourhood. Courtyards existing on elevated garden are strongly connected to the entry with escalators and elevators, whereas outdoor spaces with green are working as an easy to acces public space.

Green rooftop reduces CO2 emissions and balances heat levels on the rooftop. Rainwater harvesting is another key element for the overall roof design.
